

Welcome to Our First Lecture!

Let's Get to Know Each Other

Let's get to know each other

Discover something new about a classmate!

Agenda

- Let's learn more about each other
- What is your preferred learning style

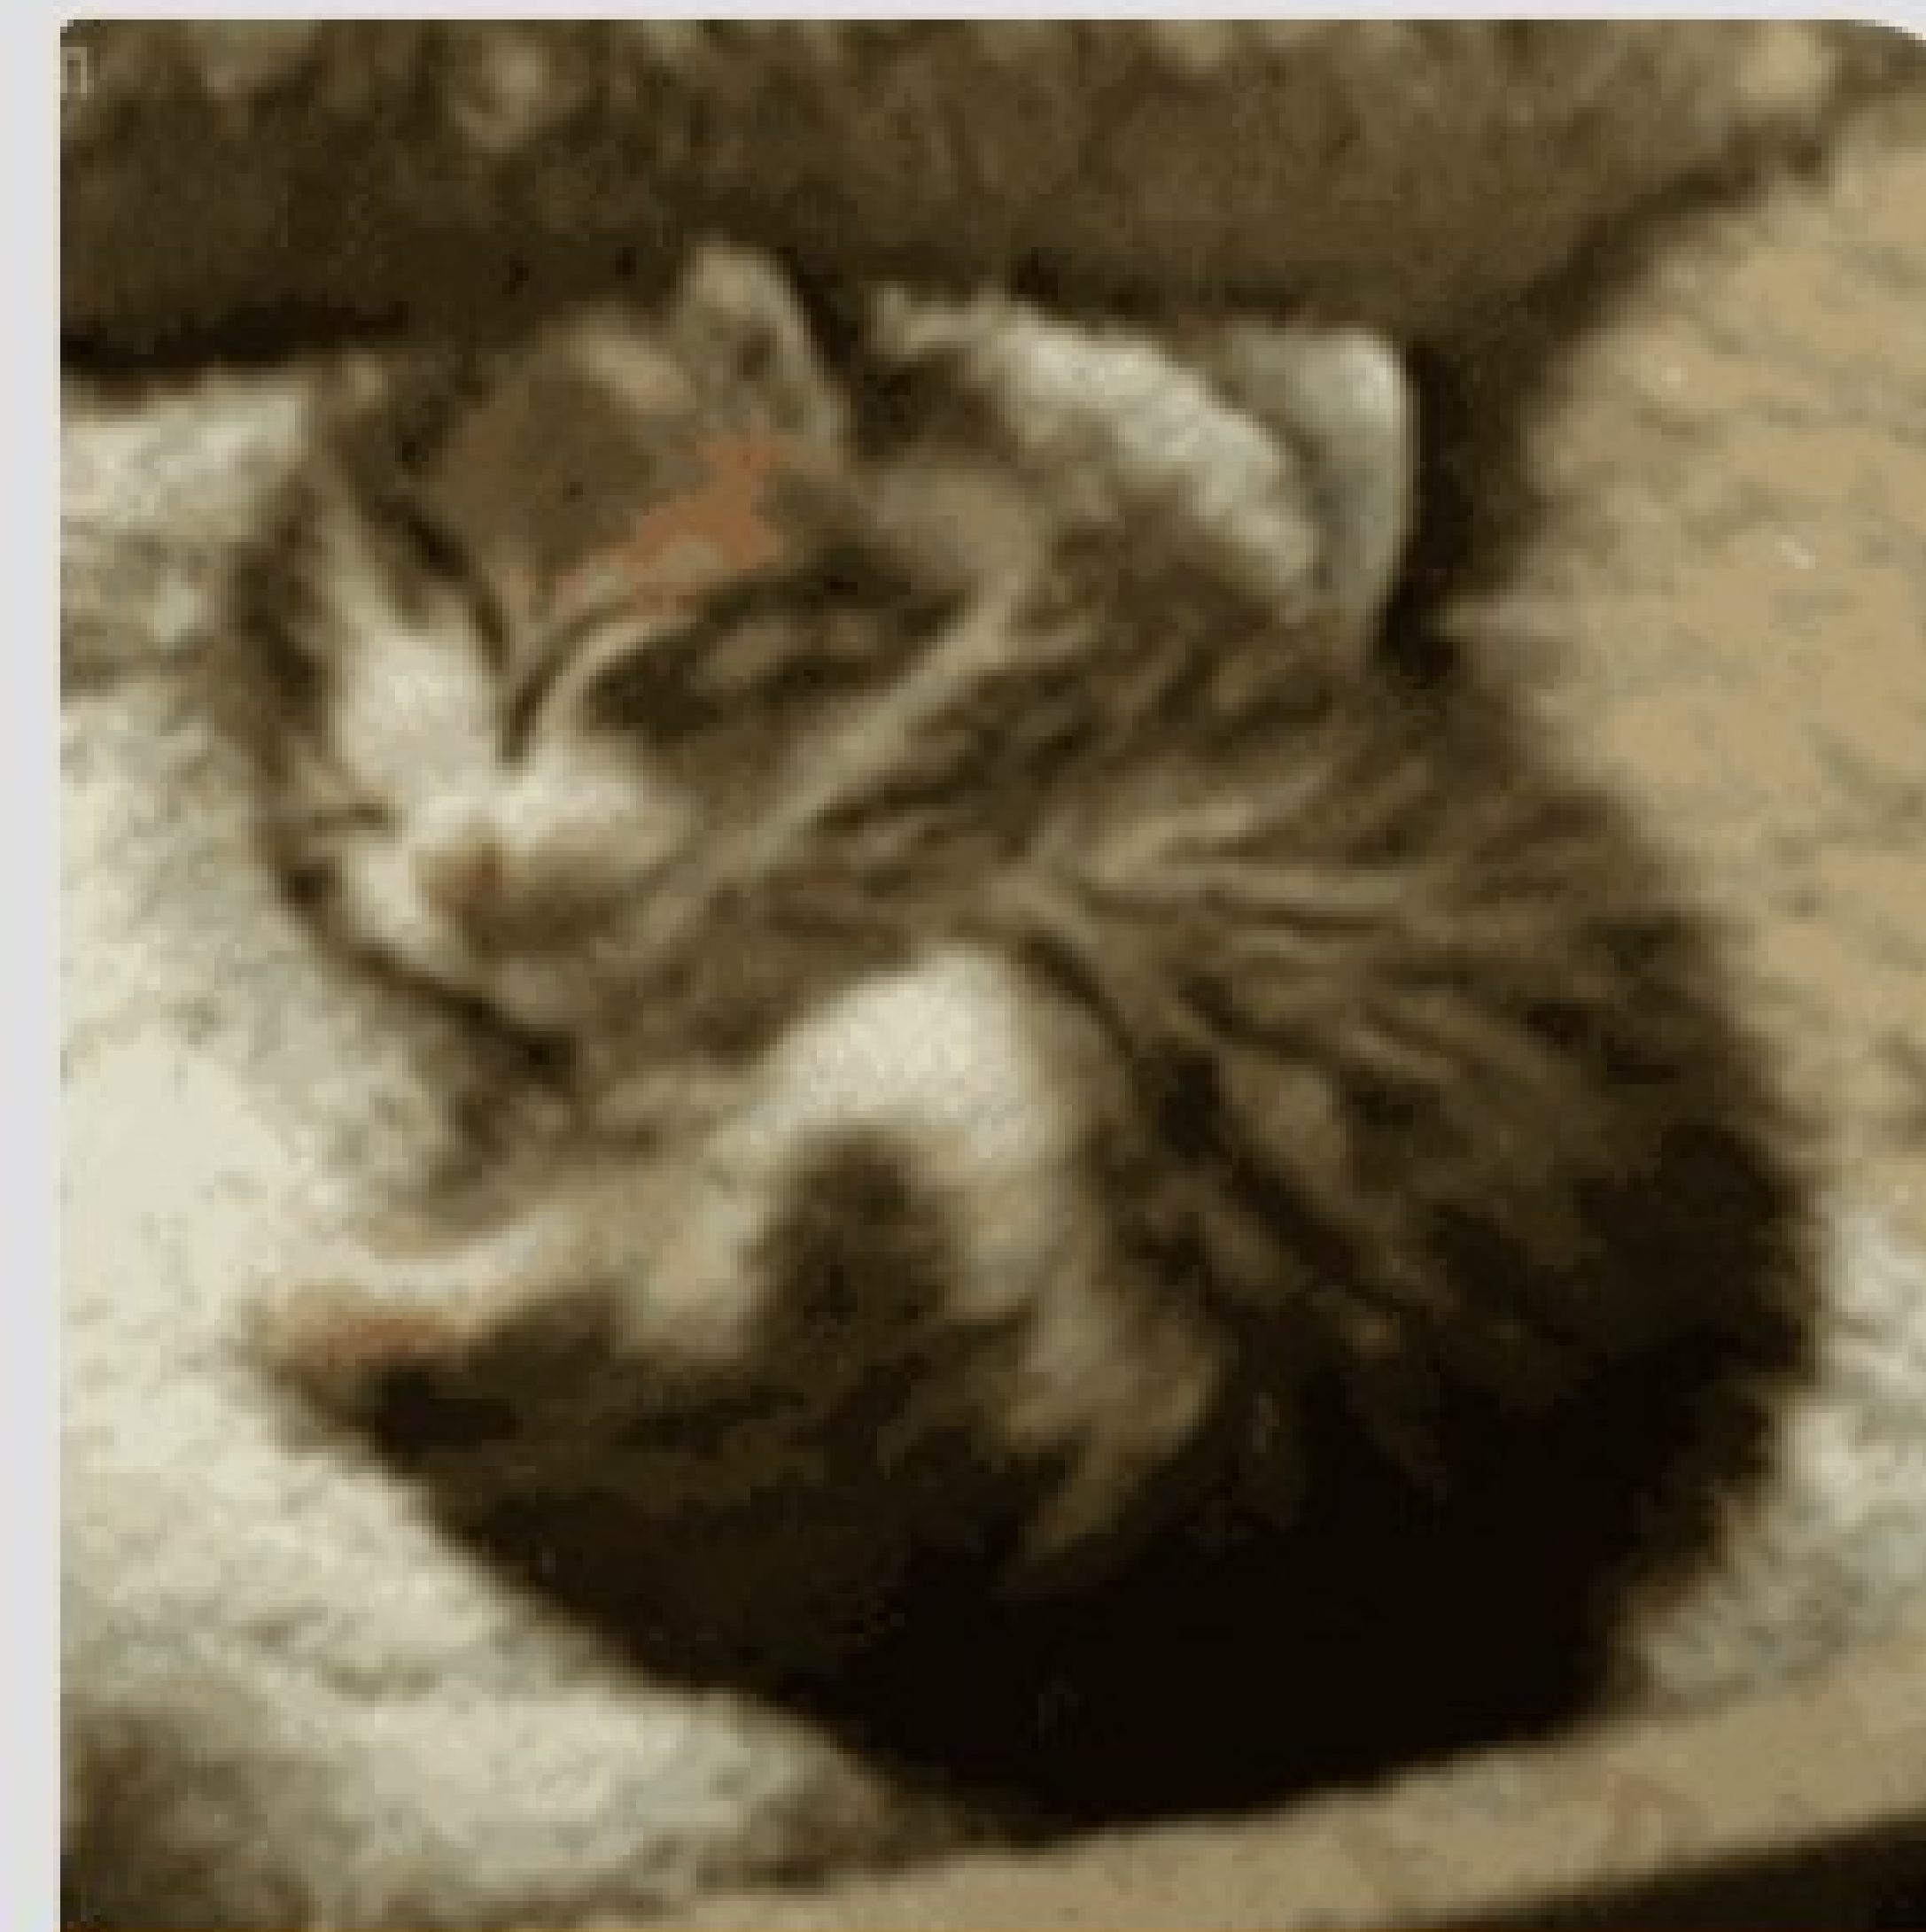

Which one do you prefer: This or That

96

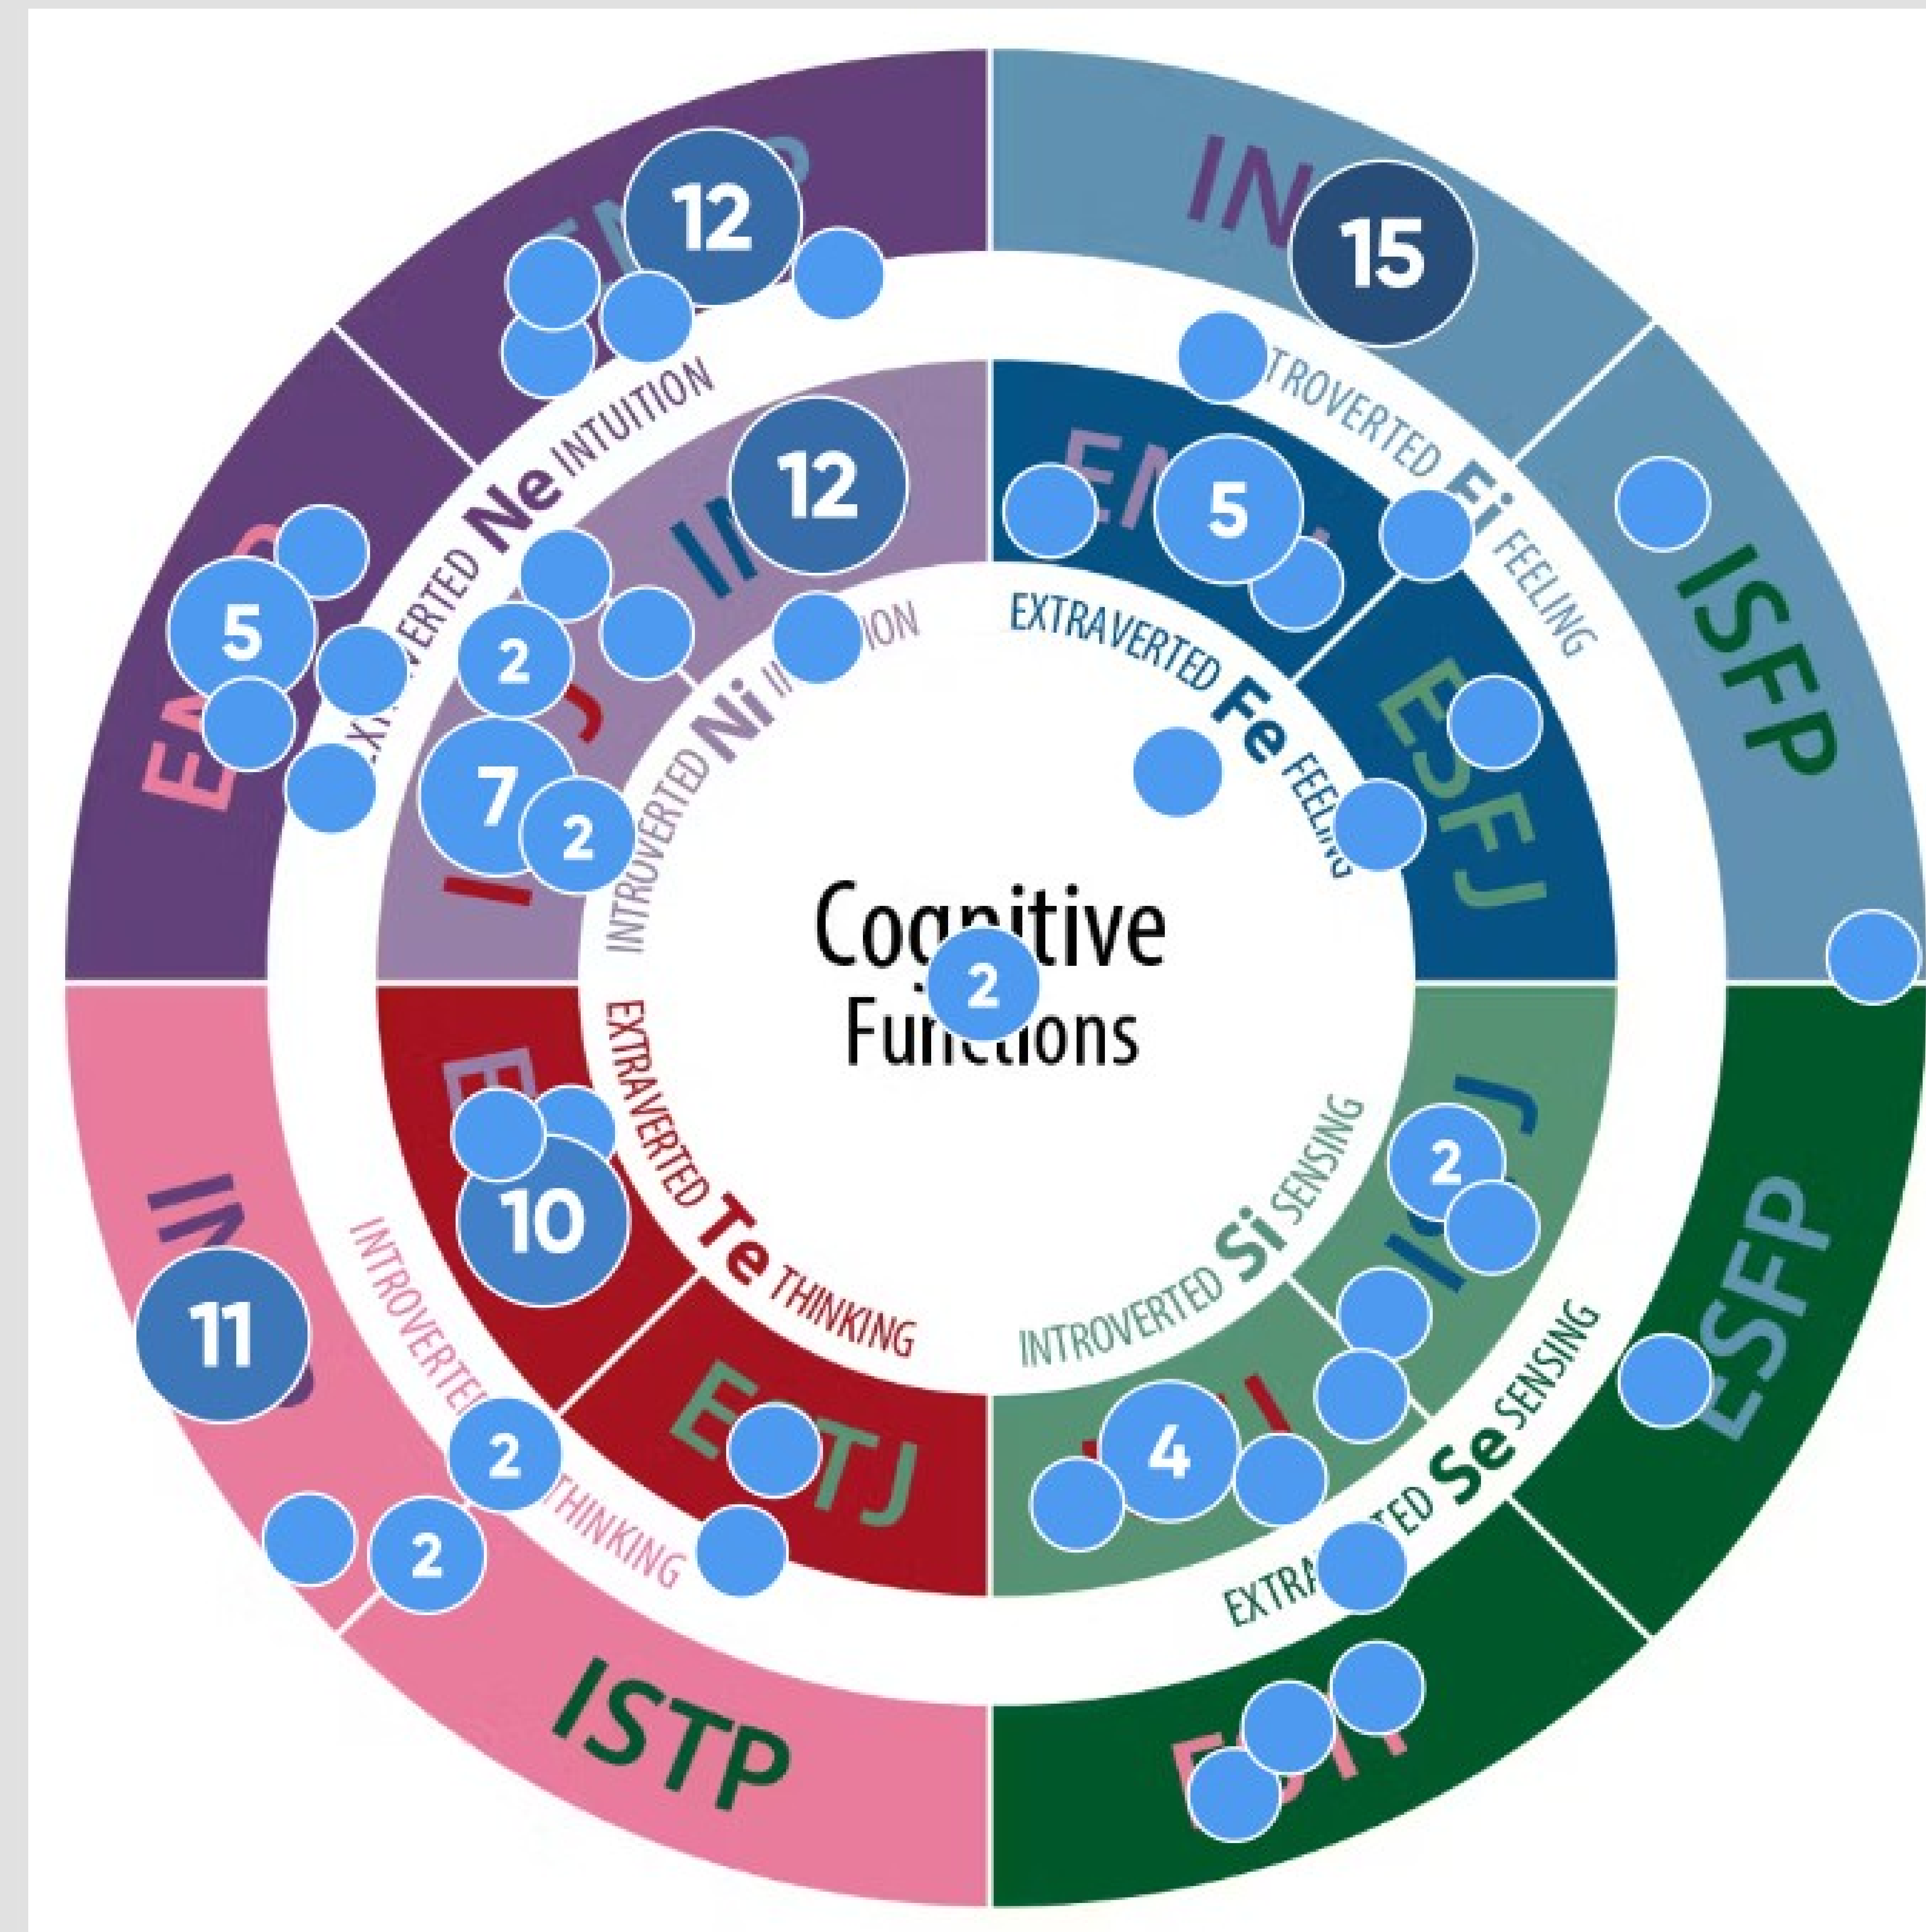

Puppy

31

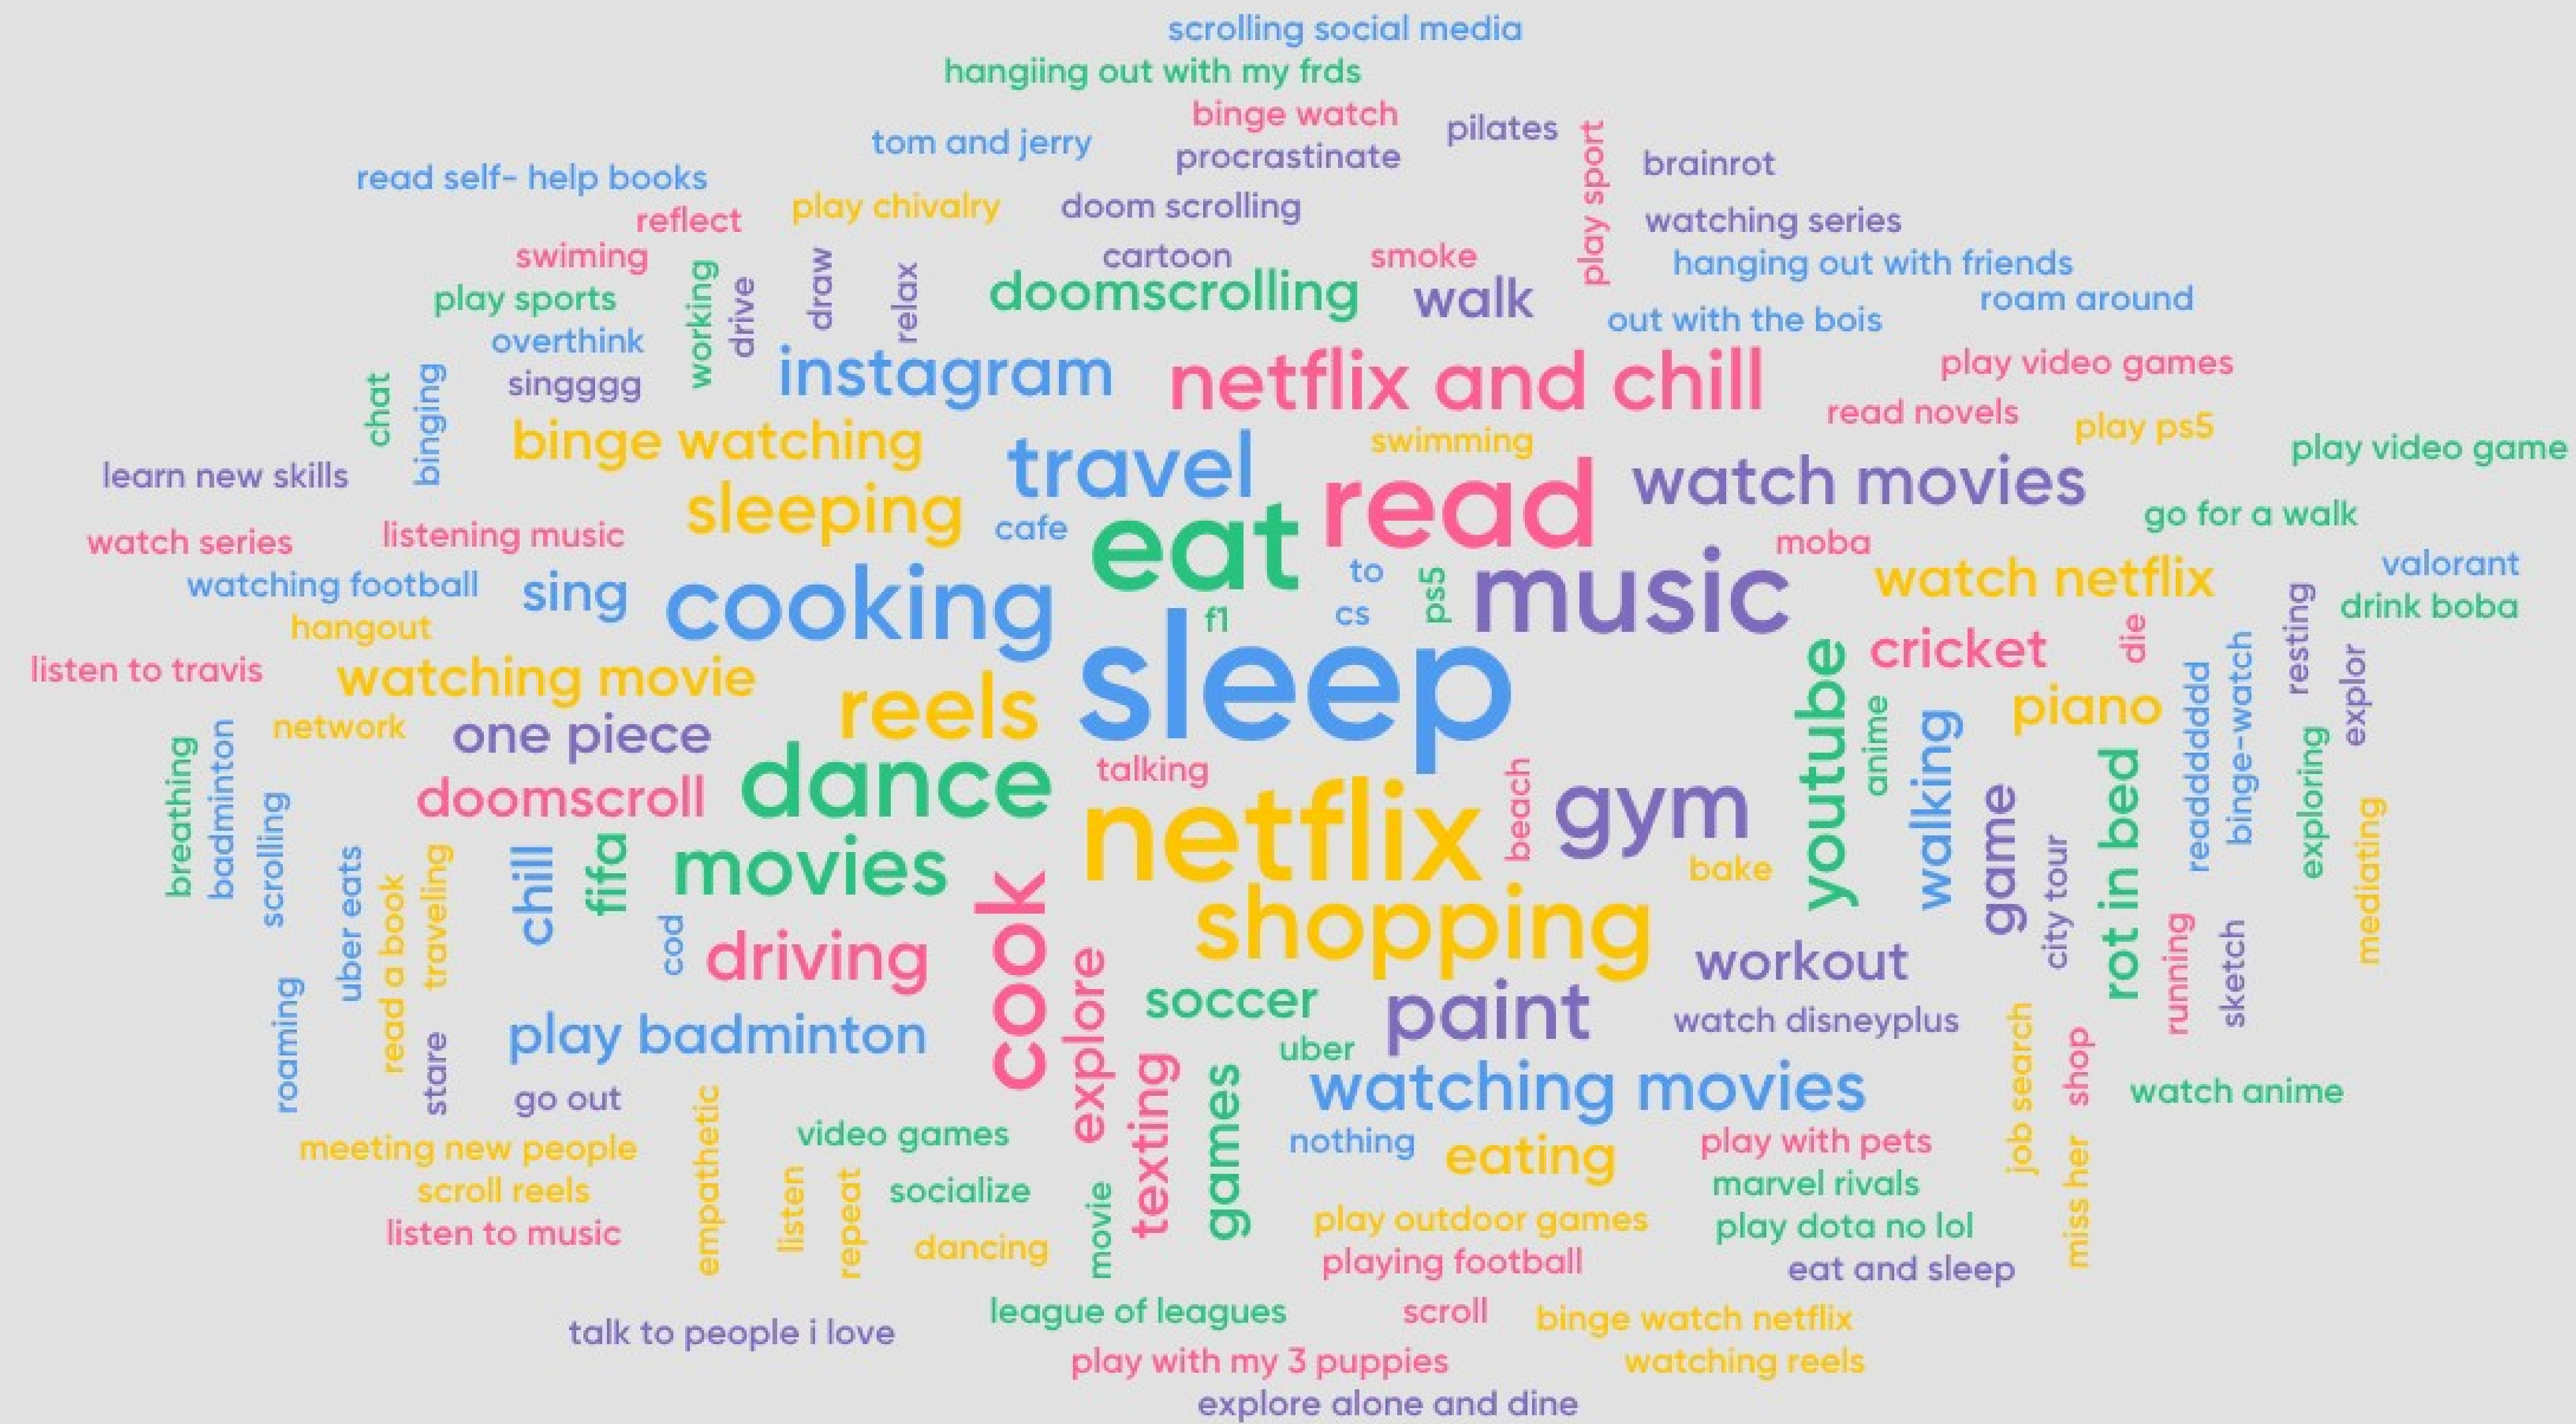

Kitten

What is your personality? – Have you tested your MBTI before?

What do you like to do in your free time?

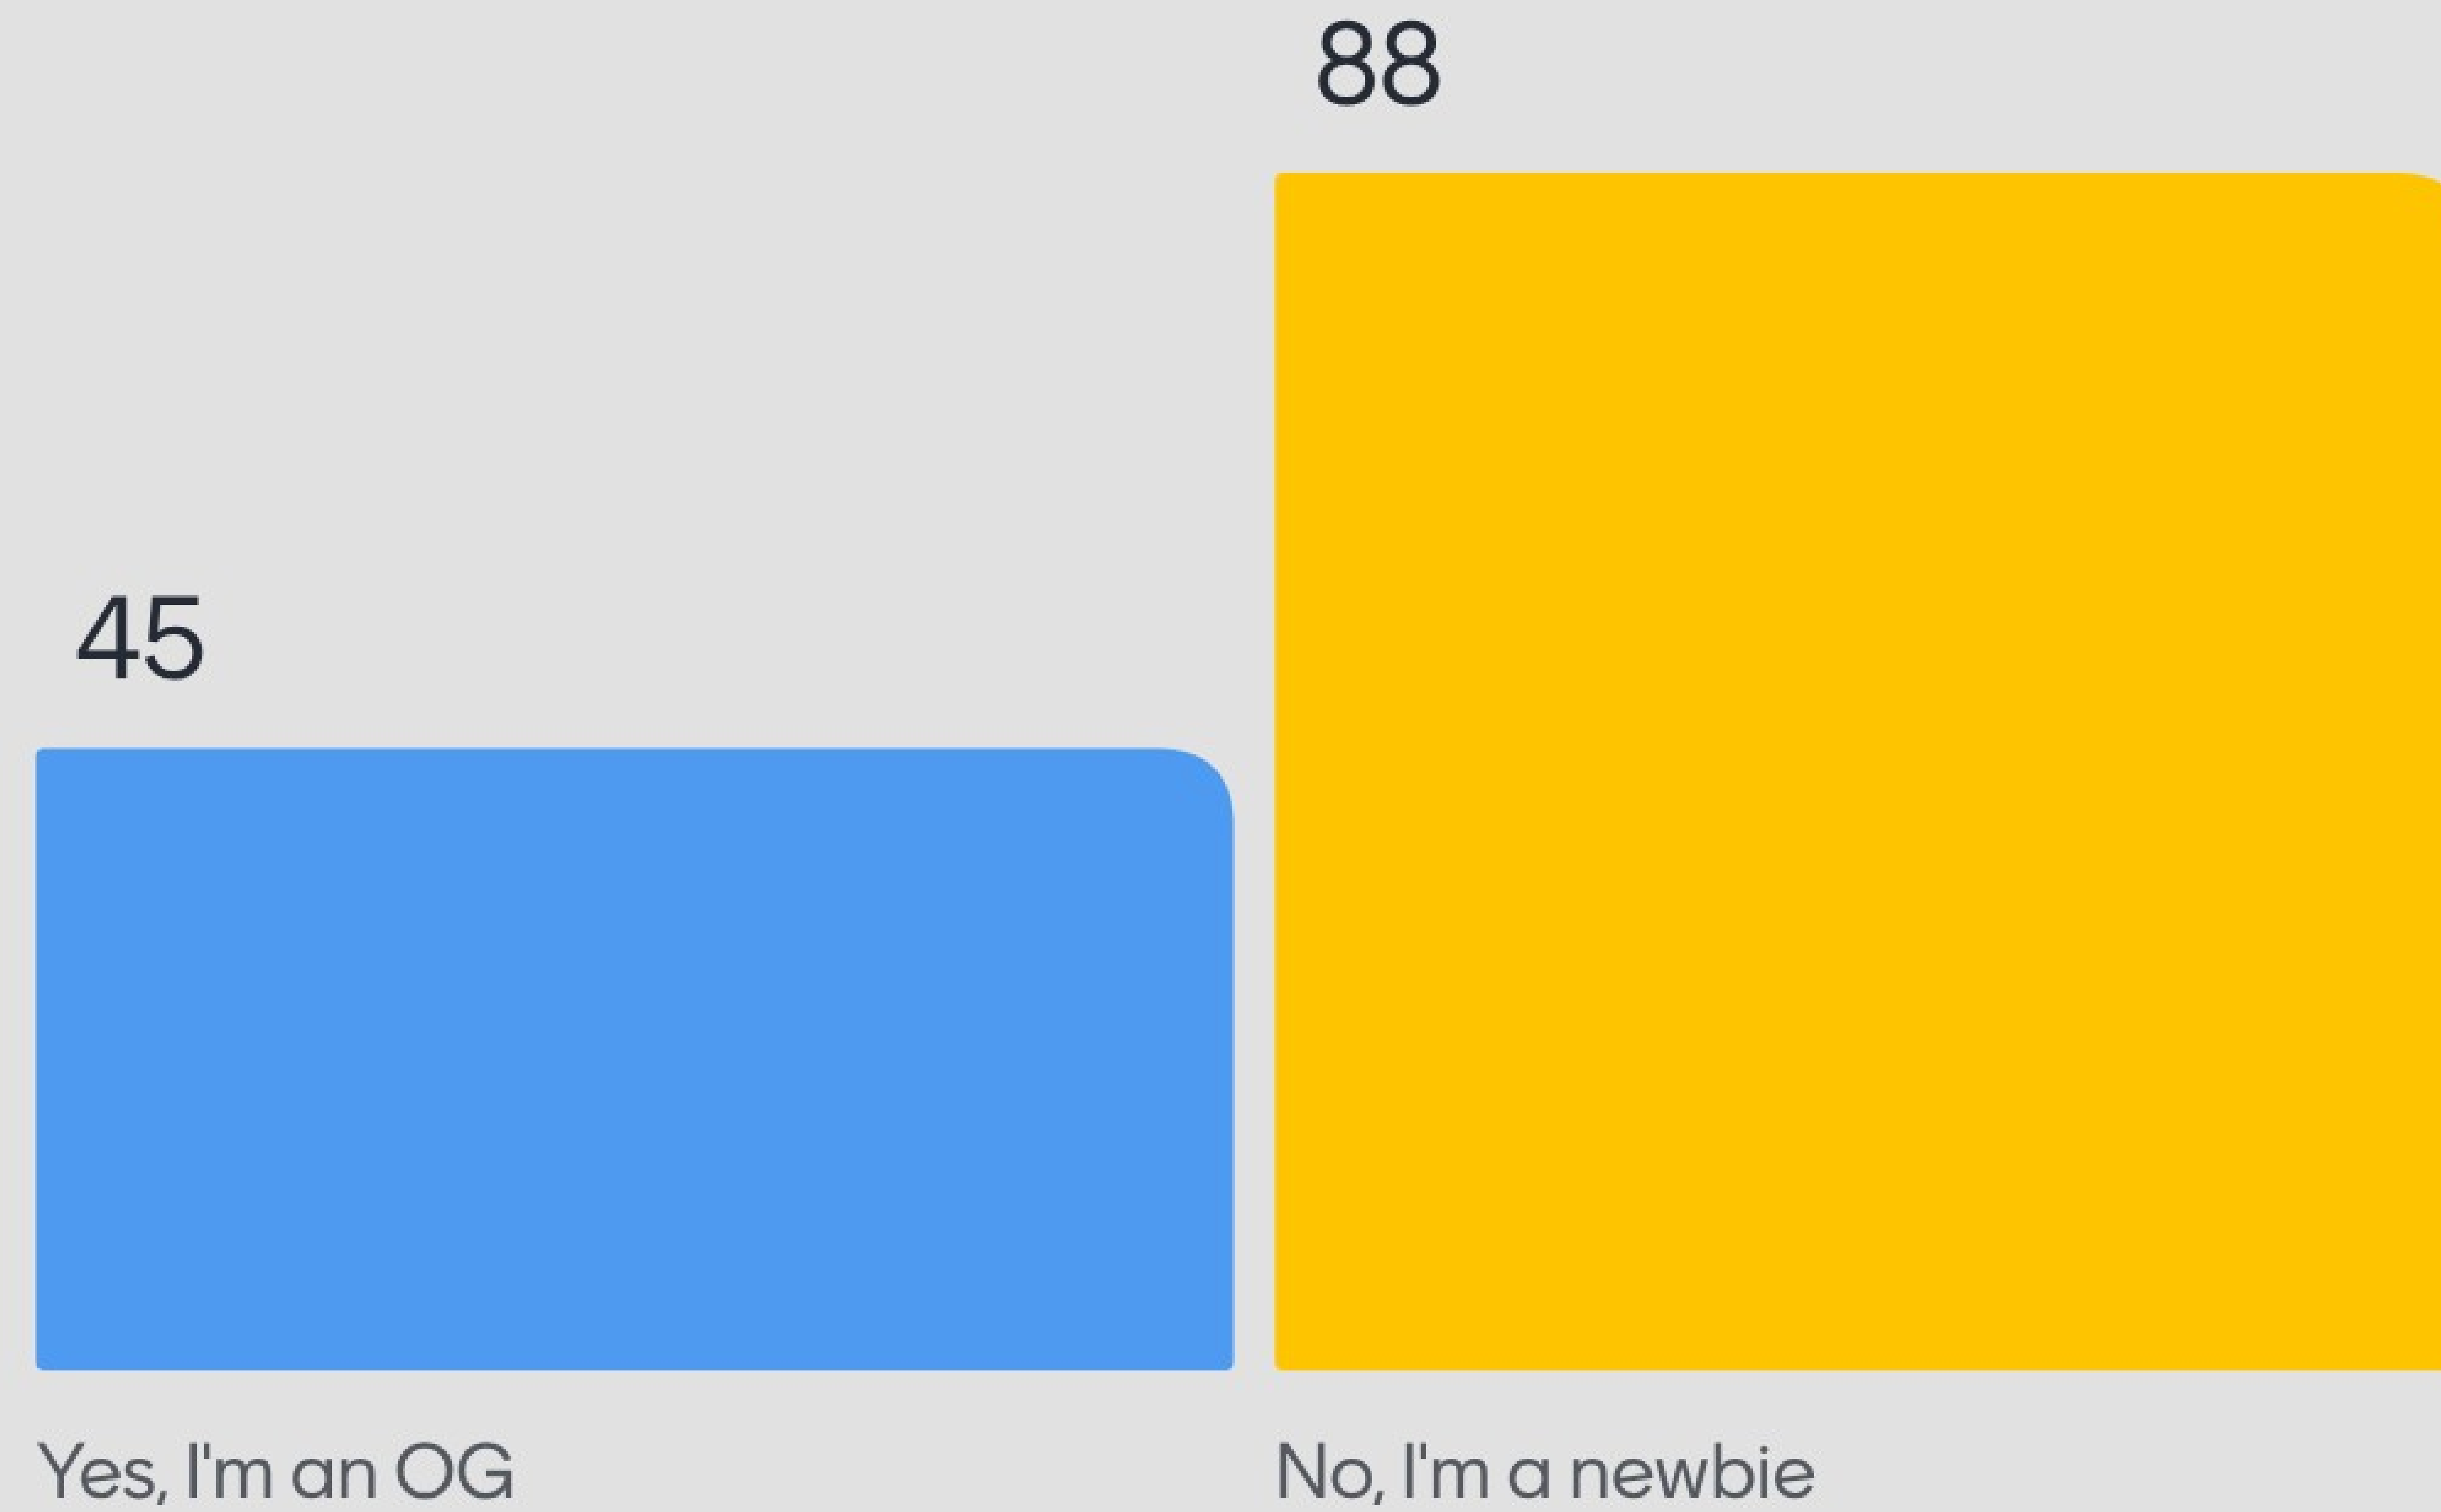

Describe Yourself in One Word?

Let's dig into how we all like to learn 🎓

Do you know SQL before?

What's your learning style?

Explain more about their learning style?

Practice and master it

experimenting

Group study

Build something

learn to earn

With real world
examples

Writing short notes

practice hands-on
exercises

Explain more about their learning style?

Examples and case study based

More practical classes

Exemplification would be the best way of explaining difficult and complex topics.

I get distracted while reading, listening or watching keeps me attentive

I like to try new things and learn in the process of trying new things.

practical learning and assessments.

practical

Need guidance and practice

Explain more about their learning style?

Notes

Prefer to try it out myself
and ask questions

Have a practical
approach and solve real
world scenarios.

special classes for SQL

Make it fun like a game

Learn then apply in real
life

More interactive and
examples base which we
can relate to the real world

Practical exercises

Explain more about their learning style?

Love listening and case study from around the world

Writing short notes

Hands on

Research and learn

Practicing the things that we have learned before in class

I like to take notes of what I learn. I am more into practical learning rather than just theories.

visualised data and discussions on real life examples

Practice exercises

Explain more about their learning style?

I don't have one...

I'm more comfortable with hands on learning and also with analysing graphs and charts , which help me with visualisation

Reading more

Need guidelines from mentor at first. Then do the things according to the order. Likes to study online.

Writing short notes

I understand better if theories have or aligned with realistic examples

Sharing knowledge

Group discussion

Explain more about their learning style?

real world examples

Real world applications

Observation followed by
practise

Learn with real world
examples

Watching you tube
videos and taking down
notes.

group study

Understanding the
basics n fundamentals
thoroughly

practical ready to work
learning

Explain more about their learning style?

Hands on real world
data

Short notes

Notes

Group study

Real world examples

Auditory Learners

Start from basic and ace
it

A friendly explanation,
easy to understand and
practice

Explain more about their learning style?

Pictures and demos helps me understand better and practice makes man perfect.

Watch an example, try it out and practice more.

practice

Real world examples
Taking physical notes

interacting with real world scenarios

I like to write most of my notes and then try to read them again and again to just understand it to the core and then I try to explain the whole topic to someone

short notes and revision

more practical, well connected, punch in the nose content (not to grasp but to learn)

Explain more about their learning style?

I love listening rather than reading then practically do them

More Study based and reading

practice and experimenting

practical hands on learning

Watch and learn by practicing

notes

Writing the notes , Watching tutorial videos and hands on exercises also help alot

Read ppt and videos

Explain more about their learning style?

Notes and practical experience.

studying with capstone projects

Notes

By watching a demo, I find it easy to get started

breaking complex ideas into smaller ones

Explanation in simpler and non-technical language

Relevant examples

Sharing knowledge

Explain more about their learning style?

Reading

reward based learning

Watching tutorial videos and recordings. And lastly more practice to master on it.

Give us food

record and listen like music

Practical learning rather than theoretical learning

Learning through live experiments and practical approach

Notes, more practical classes, more fun like a game

Explain more about their learning style?

Experiment and self
research

Need plans

Watch and copy and
understand in the
process

First get the basics done
and then gradually
move up from there

Snacks pleaseeee

Group study

Pizza???

Should we be a pro at
SQL to pass this unit?
